INVITED LECTURES

E. Bertel (Innsbruck) *A Surface Analog of One-dimensional Conducting Polymers: Charge Density Waves in* Br/Pt(110)

P. Bruno (Halle) *Magnetic exchange interactions in multilayers and ultrathin films*

J. W. Gadzuk (Gaithersburg) *Quantum Dynamics: From Debye-Waller to Atoms in Optical Lattices to Squeezed-State Desorption*

K. Heinz (Erlangen) *Surface Holography with LEED Electrons*

A. Liebsch (Jülich) *Friction at Metal Surfaces*

J. Osterwalder (Zürich) *Photoelectron Diffraction and Fermi Surface Mapping*

H. Over (Berlin) *Electronic and Reactive Properties at Surfaces seen from A Structural Point of View*

G. Paolucci (Trieste) *The Kinetics of Surface Phenomena by Fast X-ray Photoelectron Spectroscopy*

B. Poelsema (Enschede) *Pattern Formation during Homoepitaxial Growth of Cu(001)*

W. Schattke (Kiel) *Electron Scattering States for Low Energy Spectroscopies*

M. Scheffler (Berlin) *Density Functional Theory of Growth of III-V Semiconductors*

H. L. Skriver (Lyngby) *Steps, kinks, and segregation at metallic surfaces*

I. Štich (Bratislava) *Surface-tip Interactions in Noncontact Atomic-force Microscopy on Reactive Surfaces*

T. T. Tsong (Taipei) *Dynamics of Single Oxygen Molecules And Hydrogen Atoms on Si(111)-7×7 Surfaces*

M. Tsukada (Tokyo) *Physics of Artificial Nano-structures on Surfaces*

M. A. Van Hove (Berkeley) *The Structure of Compound Surfaces: from Quasicrystals To Crystalline* H_2O

P. Varga (Wien) *STM on Multicomponent Metal Surfaces*

SECOND ANNOUNCEMENT
Call for papers

VIII-th Symposium on Surface Physics

June 28 – July 2, 1999
Třešť Castle
Czech Republic

sponsored by the

European Physical Society

organized by the

Institute of Physics ASCR

Technological Foundation CR
