

CONTENTS

7-8.....	1. Introduction
9-12.....	2. Aims of the Project
9-10.....	2.1. Goals of the project
10.....	2.2. Conceptual and methodical approaches
10-11.....	2.3. Selection of chronological segments
11.....	2.4. Types of objects and their composition
11-12.....	2.5. A detailed study of a definite, chronologically sensitive phenomenon
13-44.....	3. An Archaeological View
13-14.....	3.1. Find contexts of investigated samples, basic site descriptions
14-16.....	3.2. Tumulus culture
14-16.....	Catalogue of sites
16-31.....	3.3. Urnfield cultures
17.....	3.3.1. Hoard finds of metal objects in the milieu of Urnfield cultures
17.....	3.3.2. Scrap hoards
17-18.....	3.3.2.1. List of the analyzed scrap-hoard finds
18.....	3.3.2.2. Find contexts of the samples investigated, basic site and find-group description
18-20.....	Bohemia
20-21.....	Moravia
21.....	Catalogue of localities where finds were made of hoards of the later phases of the Urnfield culture
22-23.....	Austria
22-23.....	Sipbachzell, Oberösterreich (Upper Austria, by Peter Höglinger)
24.....	3.3.2.3. Analyzed scrap hoards from Bohemia
24.....	3.3.2.4. Contents of the hoards
24-25.....	3.3.2.5. Detailed chronological classification of studied hoards

25-26.....	3.3.2.6. Comparison of analyzed groups from the viewpoint of classical archaeological dates
26-31.....	3.3.2.7. Comparison of Bohemian scrap hoards with the Sipbachzell find according to archaeologically investigated data
31-44.....	3.4. La Tène period
31-32.....	3.4.1. Group A - ring ornaments of the period Ha D3 and LT A
32.....	3.4.2. Group B - ring ornaments of the beginning of the LT B1 period
32.....	3.4.3. Group C - rings with plastic decoration in relief
32-33.....	3.4.4. Group D - beaded rings
33.....	3.4.5. Groups E to J - rings with hollow hemispheres
33.....	3.4.6. Group K, Group L
34.....	3.4.7. Group M, Group O
33.....	3.4.8. Groups P - imported rings, Group S - brooches
34-44.....	Catalogue of analyzed bronze finds of the La Tène age
45-50.....	4. Measurement and Evaluation Methods
45-46.....	4.1. X-ray fluorescence analysis
46-47.....	4.2. Neutron activation analysis
47-48.....	4.3. Problem of the strongly corroded surfaces
48.....	4.4.1. Contamination of samples from the environment
48-49.....	4.3.2. Discharge of material by the object
49.....	4.4. Measurement on mechanically cleaned surfaces
49.....	4.5. Taking samples for the NAA
49-50.....	4.6. XRFA measurements on samples taken for NAA (strips, flakes)
50.....	4.7. Differences between XRFA and NAA results
50.....	4.8. Documentation in the course of analyses
51-78.....	5. Analyses of the Bronze Age Artifact Composition
51-55.....	5.1. Tumulus culture (Middle Bronze Age)
51-52.....	5.1.1. Sample characteristics
52-54.....	5.1.2. Individual sites
54-55.....	5.1.3. Comparison with earlier results
55.....	5.1.4. Conclusions
55-62.....	5.2. Late Bronze Age raw materials
55-57.....	5.2.1. Forms and structures

57.....	5.2.2. The size and weight
57-62.....	5.2.3. Characterisation of ingots elemental composition
63-73.....	5.3. Analysis of the Urnfield cultures artifact composition
63.....	5.3.1. Characterisation of the bronzes
63-69.....	5.3.2. Characterisation of the hoards
69.....	5.3.3. Element concentrations in functionally different types of objects
69-70.....	5.3.4. Comparison with element concentrations in later phases of the scrap hoards
70-73.....	5.3.5. The bronze formula: the amount of tin in the alloy
74-78.....	5.4. The origin and effects of the other elements present in the copper
79-93.....	6. Analytical Results of la Tène Age Artifacts
79-82.....	6.1. General characteristics of the objects
82-83.....	6.2. Results of analyses of particular object groups
83.....	6.2.1. Final Hallstatt period and LT A, group A
83-89.....	6.2.2. Group B, ring ornaments of the beginning of the LT B1 period
89.....	6.2.3. Group C, rings with plastic decoration
89.....	6.2.4. Group D, beaded rings
89.....	6.2.5. Groups E, F and G, rings with hollow hemispheres
89-90.....	6.2.6. Group H, rings with joining links
90.....	6.2.7. Group J, smooth rings with hollow hemispheres
90.....	6.2.8. Groups K and L
90.....	6.2.9. Groups M and O, rings with S-shaped relief decorations
90.....	6.2.10. Brooches
91.....	6.2.11. Non-aligned artifacts, imports, errors
91.....	6.2.12. Confrontation with published results of the first stage of the project
91-93.....	6.2.13. Conclusions from the results
94.....	7. Conclusion
95-118.....	Annex 1
119-130.....	Annex 2
131-151.....	Annex 3
152-160.....	Annex 4
161-164.....	Annex 5

165-173.....	Annex 6
174-183.....	Shrnutí
184-188.....	References
189-190.....	List of plates
191-220.....	Plates

Jaroslav FRÁNA – Nuclear Physics Institute of the Czech Acad. Sci., Řež near Prague
Luboš JIRÁŇ – Archaeological Institute of the Czech Acad. Sci.m Prague
Václav MOUCHA – Archaeological Institute of the Czech Acad. Sci.m Prague
Pavel SANKOT – Museum of Central Bohemia, Rožtoky
Peter HÖGLINGER – University of Salzburg
