

Electronic Appendix 1. – The list of selected characteristics of all sampling sites. Abbreviations: No., number of the sampling site; Date, sampling date; Location, locality name; Elev., elevation of the sampling site [m a.s.l.]; GPS, rough position data of the sampling site; Habitat type, habitat type of the sampling site. Habitat categories: dwarf wall, all types of small walls in urban areas; field margin, surrounding weedy vegetation adjacent to all types of fields; forest margin, vegetation of forest margin; grass plot, man-made grassy site with compact turf, especially within the city or village; meadow, all types of meadows, especially outside the city or village; path margin, vegetation of path borders - usually in public parks and gardens; pond bottom, spontaneous vegetation of empty ponds; railway site, vegetation near railway buildings and railway tracks; road margin, vegetation of road borders, pitches and pavements; ruderal site, disturbed place near built-up areas, industrial facilities and dumps; water margin, vegetation of river banks and other water sites.

No.	Date	Location	Elev.	GPS	Habitat type	Invasive species	Dominant species
1	23-Jul-07	České Budějovice	390	N48 58.469 E14 28.462	path margin	<i>Impatiens parviflora</i>	<i>Urtica dioica</i>
2	25-Jul-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	water margin	<i>Impatiens glandulifera</i>	<i>Artemisia vulgaris</i>
3	25-Jul-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	meadow	<i>Solidago canadensis</i>	<i>Arrhenatherum elatius</i>
4	25-Jul-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	railway site	<i>Sisymbrium loeselii</i>	<i>Daucus carota</i>
5	1-Aug-07	České Budějovice	390	N48 58.469 E14 28.462	ruderal site	<i>Amaranthus retroflexus</i>	<i>Chenopodium album</i> agg.
6	1-Aug-07	České Budějovice	390	N48 58.469 E14 28.462	meadow	<i>Geranium pyrenaicum</i>	<i>Carex hirta</i>
7	1-Aug-07	České Budějovice	390	N48 58.469 E14 28.462	water margin	<i>Bidens frondosa</i>	<i>Carex hirta</i>
8	1-Aug-07	České Budějovice	390	N48 58.469 E14 28.462	grass plot	<i>Sisymbrium loeselii</i>	<i>Poa annua</i>
9	2-Aug-07	České Budějovice	390	N48 58.469 E14 28.462	grass plot	<i>Erigeron annuus</i>	<i>Lolium perenne</i>
10	9-Aug-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	railway site	<i>Galinsoga parviflora</i>	<i>Digitaria sanguinalis</i>
11	9-Aug-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	railway site	<i>Amaranthus retroflexus</i>	<i>Digitaria sanguinalis</i>
12	9-Aug-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	ruderal site	<i>Helianthus tuberosus</i>	<i>Dactylis glomerata</i>
13	9-Aug-07	Třebechovice.p.O.	242	N50 12.057 E15 59.534	ruderal site	<i>Rumex thyrsiflorus</i>	<i>Arrhenatherum elatius</i>

Electronic Appendix 2. – The list of the AMF intensity for the studied invasive species and their corresponding native dominant species of the sampled site. The values in this table (in%) were obtained by averaging the observations of three specimens of invasive plant species and of three specimens of corresponding native dominant species. Abbreviations: *No.*, number of the sampling site; *Total*, total mycorrhizal colonization (including arbuscules, vesicles, and hyphae together); *Arb.*, arbuscular colonization; *Ves.*, vesicular colonization.
