

Contents

- Pavel Ctibor, Anne-Elise Lescoffit, Benjamin Teboul, Karel Neufuss, Karel Voleník: Abrasion resistance of alloy coatings deposited by plasma spraying 113–126
Load Abstract
- Omar Bendjeghaba, Dris Ouahdi: Ant colony system for reliability optimization design problem of multi-state power system 127–137
Load Abstract
- Lenka Karasová, Karel Záliš: Disturbance influence on partial discharge measurement and methods of its elimination in case of digital data processing 139–159
Load Abstract
- Pavel Karban, Ivo Doležel: Integrodifferential model of pulse current in long massive nonferromagnetic cylindrical conductor 161–178
Load Abstract
- David Pánek, Jiří Lahoda Josef Hrušák, Milan Štork: On chaotic systems synthesis and synchronization 179–198
Load Abstract
- Jakub Červený: On constrained approximation in higher-order finite element methods in 2D 199–221
Load Abstract
