

Contents

Arun K. Gupta, Neeri Agarwal, Sanjay Kumar: Free transverse vibrations of orthotropic visco-elastic rectangular plate with continuously varying thickness and density	113–129
<i>Load Abstract</i>	
Milind Thomas, Jibendu S. Roy, Bhaskar Gupta: Design of a miniaturized proximity-coupled microstrip antenna for 5 GHz band wireless communication	131–138
<i>Load Abstract</i>	
Želmíra Ferková, Ladislav Zboray: Observers for an elastic & two-mass system	139–148
<i>Load Abstract</i>	
S. Rajashekhar, K. P. Vittal: Novel algorithm for control of a shunt active power filter based on a three-level voltage source inverter	149–162
<i>Load Abstract</i>	
Jakub Bernatt: AC motors and generators with six-phase stator windings	163–177
<i>Load Abstract</i>	
Lukasz Majka, Stefan Paszek: Algorithms for estimation of model parameters of excitation system of an electrical machine	179–194
<i>Load Abstract</i>	
Maciej Pańczyk, Jan Sikora: Infinite boundary element application in optical mammography	195–207
<i>Load Abstract</i>	
Rainer Haller, Jiří Kožený: Influence of thermal radiation on heat transfer in electrical equipment	209–221
<i>Load Abstract</i>
