

CONTENTS

- Zygmunt Piątek: Method of calculating total eddy currents induced in screens of a symmetrical three-phase single-pole gas-insulated transmission line 103–120
Load Abstract
- Piotr Jankowski, Stanisław Rymkiewicz: Stress analysis of magneto-elastically vibrating disc 121–139
Load Abstract
- Ladislav Musil: Novel transformation of material parameters for better discretization of very thin skin depth and its applications . . 141–157
Load Abstract
- Stefan Paszek, Andrzej Pawłowski: Application of power system stabilizers PSS3B to electromechanical swing damping in multi-machine power system 159–171
Load Abstract
- Pavel Karban, Ivo Doležel, Martina Donátová: Integrodifferential approach to modelling of continual induction heating of nonmagnetic cylindrical bodies 173–192
Load Abstract
- Dariusz Spalek, Krzysztof Waleczek: Analytical approach to electromagnetic torque for spherical induction motor with anisotropic and conductive rotor 193–207
Load Abstract
