

CONTENTS

- Mehdi Harzchi, Naser Alinejad: Non-circular cross-section geometry effects on perturbed radial magnetic field in Damavand tokamak 309–315
Load Abstract
- Marie Štěpánková, Jan Grégr, Jakub Wiener, Jana Müllerová, Jana Grabmüllerová: Plasma treatment of Kevlar and Nomex 317–322
Load Abstract
- Hartmut Lange, Rüdiger Foest, Jan Schäfer, Klaus-Dieter Weltmann: Absolute vacuum UV emission from the effluent of an atmospheric pressure plasma jet with Ar/Xe and Ar/Kr mixtures in ambient air 323–331
Load Abstract
- David Mascali, Lorenzo Torrisi, Santo Gammino, Daniele Margarone, Fabio Maimone, Rosalba Miracoli, Nadia Gambino: Langmuir probe characterization of laser-generated plasmas 333–345
Load Abstract
- Mariusz Jasiński, Zenon Zakrzewski, Jerzy Mizeraczyk: New atmospheric pressure microwave microplasma source 347–354
Load Abstract
- Radoslav Krehel': Mathematical model of machining process with regulation of particular parameter 355–373
Load Abstract
- Aleš Hála: Generation of homogeneous and high-gradient magnetic fields by systems of permanent magnets 375–391
Load Abstract
- Zygmunt Piątek: Impedances of finite-length isolated phase busducts 393–413
Load Abstract
