

Contents

Vladimir Prakht, Vladimir Dmitrievskii, Vadim Kazakbaev: Mathematical modeling and analysis of flux-switching permanent magnet machine	327–339
<i>Abstract</i>	
Tomasz Adrikowski, Dawid Buła, Marian Pasko: Hybrid and pure active power filters in the common application	341–350
<i>Abstract</i>	
Joanna Kolańska-Pluska, Jerzy Barglik, Bernard Baron, Zygmunt Piątek: Computation of current density in cylindrical charges in the process of induction heating by code Flux 3D	351–360
<i>Abstract</i>	
Mariana Beňová, Branislav Dobrucký: Analysis and simulation of LCTL resonant inverter with multifunction output	361–381
<i>Abstract</i>	
Piotr Pruski, Stefan Paszek: Investigations of calculation accuracy of power system electromechanical eigenvalues based on analysis of selected disturbance states	383–393
<i>Abstract</i>	
Vladimír Král, Stanislav Rusek, Radomír Goňo: Description of software determining optimum maintenance sequence for 110 kV power circuit breakers with SF ₆	395–406
<i>Abstract</i>	
Daniela Gombarska, Barbora Czippelova: Computer simulation of human cardiovascular system	407–420
<i>Abstract</i>	
Petr Polcar, Daniel Mayer: Design of a stepper transducer with ferrofluid	421–433
<i>Abstract</i>	
Marneni Narahari: Effects of thermal radiation and mass diffusion on free convection flow past an impulsively started infinite vertical plate with ramped temperature	435–450
