

Contents

- Daniel Mayer: Contribution to investigation of influence of geomagnetic storms on electrification system 351–365
Abstract
- Mykhaylo Zagirnyak, Viacheslav Prus, Alyona Nikitina: Method of low-voltage electric network power processes control and their quality assurance on the basis of p - q - r theory 367–380
Abstract
- Anatolii I. Sudakov, Evgenii A. Chabanov, Nikolai V. Shulakov: Novel approaches to analysis of transition processes identification error by probability-statistical methods during sudden symmetric short-circuit tests of synchronous machines 381–392
Abstract
- Petr Kokeš, Radko Semerád: Active control of flying capacitor currents in multilevel voltage-source inverters 393–410
Abstract
- Krishnendu Bhattacharyya: Heat transfer analysis in boundary layer flow over a non-isothermal shrinking cylinder with wall mass suction 411–424
Abstract
- M. Gnaneswara Reddy: Magnetohydrodynamic and radiation heat transfer boundary layer flow of a nanofluid past a stretching sheet with velocity slip and convective boundary conditions . . . 425–442
Abstract
- Daniel G. Gorman, Jaromír Horáček, Anthony J. Mulholland, Maire N. Gorman: Analysis and interpretation of compressible fluid interaction upon the vibration of a circular membrane 443–461
Abstract
