

EURAD 1ST ANNUAL EVENT

16th - 18th March 2021

The European Joint Programme on Radioactive Waste Management (EURAD) is now in its 2nd year, producing results of RD&D, Strategic Studies and Knowledge Management work undertaken from across 23 countries in Europe. This first annual event is dedicated to Scientific Excellence providing an action-packed 3 days of sharing the latest advances and challenges across our RD&D work packages,

The event is virtual and free. We plan for short sessions and lively debates.

AGENDA

March 16th (09.00-12.00)

Science supporting implementation (plenary session)

March 17th (09.00-12.00 / 14.00-16.00):

Cross-cutting work in EURAD (breakout sessions):

- *Consideration of redox processes and influences from organics and other wastes in geological disposal facilities: approaches in different programmes (WP CORI, FUTURE, ROUTES and KM)*
- *Thermal consequences and uncertainties in the back-end of the nuclear fuel cycle and in a geological repository (WPs HITEC, SFC, UMAN and KM)*
- *Repository-induced coupled processes (WPs ACED, DONUT, HITEC, GAS and KM)*

School of RWM, Mobility and PhDs / post-docs presentations

March 18th (09.00-12.30):

Spotlight on cutting-edge science from across EURAD WPs (plenary session)

Further information will be included in the detailed agenda which will be finalised and available on the EURAD website soon, but for now....
