Slovanský ústav AV ČR, v. v. i.,

Vás srdečně zve na přednášku

Using Ukrainian Corpora in Lexicography

Přednášku prosloví **Dr. Maria Shvedova** z Univerzity Friedricha Schillera v Jeně ve čtvrtek **7. prosince 2023 v 10 hodin** v zasedací místnosti Slovanského ústavu AV ČR, Valentinská 1, Praha 1, 3. patro (zvoňte, prosím, na sekretariát).

The talk is devoted to describing the possibilities of using Ukrainian language corpora in compiling different types of dictionaries. The high variability of the Ukrainian language, which should be taken into account when compiling dictionaries, will be discussed. The experience of compiling
a corpus-based morphological dictionary of Ukrainian will also be presented. This dictionary captures a number of grammatical forms that are lacking in academic dictionaries but are actually used in Ukrainian texts.
The presentation will be based on the materials of the course "Computer lexicography" given at Lviv Polytechnic in 2021 and 2022.
