

Visit by EU journalists

On Wednesday 6th, a group of twenty journalists from various European countries (Belgium, Germany, Greece, Lithuania, Poland, Spain) visited IMG.

This visit was within the programme of the Conference “Research Connections 2009” organized in Prague, May 7-8, as part of the Czech EU Presidency activities by the European Commission. The journalists were presented with basic facts on the Institute by our Director and then visited the Laboratory of Genomics and Bioinformatics and the Laboratory of Biology of the Cell Nucleus, where they were introduced to the scientific research topics and took pictures of the most recent equipment. Facts about the visit will appear in the Conference materials.
