Assoc. Prof. Marek Jindra, Ph.D.

Institute of Entomology, Biology Centre AS CR, v.v.i.

„Drosophila genetics reveals interaction between the dimerizing bZIP proteins Jun and ATF3 during development“

The speaker has recently published important papers on *Drosophila* development, genome of beetle *Tribolium castaneum*, insect juvenile hormone signaling, nuclear receptors and beta-catenin signaling in *C. elegans*, etc.

The seminar will be held

on Wednesday 20. 5. 09 at 15.00

in the Milan Hašek Auditorium.
