October 25, 2007

Workshop: Spectrally Assigned Localisation Microscopy (SALM) of Cellular Nanostructures

Topics:

- **Lightoptical structure analysis at molecular resolution**
- **Present state of SALM: photoconversion, single molecule spectroscopy, optics FPALM, PALM, PALMIRA, SPDM, STORM,**
- **SALM- Labelling**
- **Future Directions**
- **Exploration of Collaboration Potential**

Invited Key Note Speaker :
Sam Hess, Orono/ME

Participants are invited to contribute with short oral presentations or posters (techniques, biological problems)

Registration

Registrations will be accepted until the meeting is filled.
