The Institute was established in 1959 by merging two units of the Czechoslovak Academy of Sciences: the Department of Information Theory of the Institute of Radio Engineering and Electronics, and the Laboratory for Automation and Telemechanics. Pursuant to Act No. 341/2005 Coll., the Institute became a public research institution as of 1 January 2007.

The Institute conducts research in cybernetics and informatics, particularly in the theory of systems and random processes for mathematical modelling, automatic control, optimisation, uncertainty decision-making, image and signal processing, and pattern recognition.

The Institute publishes the journal Kybernetika (Cybernetics) in English.

More detailed information about the organisational structure of the Institute and its research and specialised units can be found at the following URL: http://www.utia.cas.cz
