

ACADEMY OF SCIENCES OF THE CZECH REPUBLIC

Based upon Act No. 283/1992 Coll., on the Academy of Sciences of the Czech Republic, as subsequently amended, and upon Act No. 341/2005 Coll., on public research institutions, and in accordance with the Statutes of the Academy of Sciences of the Czech Republic issued on 24 May 2006, the Academy of Sciences of the Czech Republic (hereinafter ASCR) hereby issues

the Foundation Deed of the Nuclear Physics Institute of the ASCR, v. v. i.

I.

(1) The Institute was established by a resolution of the twenty-fifth session of the Presidium of the Czechoslovak Academy of Sciences (hereinafter CSAS) held on 22 December 1971, which took effect on 1 January 1972, under the name the Nuclear Physics Institute of the CSAS. Under section 18 (2) of Act No. 283/1992 Coll., the Institute became an entity of the ASCR as of 31 December 1992. By a resolution of the constituting session of the Academy Assembly of the ASCR held on 24 and 25 February 1993, the Institute of Radiation Dosimetry of the ASCR, identification number 00213772, located in Prague 8, Na Truhlářce 39/64, was consolidated into the Nuclear Physics Institute of the ASCR as of 30 June 1994.

(2) Under Act No. 341/2005 Coll., the legal status of the Nuclear Physics Institute of the ASCR will be transformed from a state contributory organisation into a public research institution (abbreviated as v. v. i.) from 1 January 2007.

II.

(1) The Nuclear Physics Institute of the ASCR, v. v. i., (hereinafter NPI) is established for an indefinite period as a legal entity with identification number 61389005, and is located at Husinec-Řež No. 130, Postal Code 250 68.

(2) The founder of the NPI is the ASCR, an organisational body of the state, identification number 60165171, headquartered in Prague 1, Národní 1009/3, Postal Code 117 20.

III.

(1) The purpose for which the NPI has been established is to carry out scientific research in the fields of nuclear physics and related scientific disciplines, to contribute to the utilisation of its research results, and to provide the research infrastructure.

(2) The principal activity of the NPI is scientific research in the fields of nuclear physics and related scientific disciplines and the use of the nuclear physics methods and procedures in interdisciplinary fields of science and research, especially in biology, environmental science, medicine, radiopharmacy and materials science. The NPI contributes to raising the level of knowledge and education and to utilising the results of scientific research in practice. It acquires, processes and disseminates scientific information and issues scientific publications (monographs, journals, proceedings, etc.). It provides scientific assessments, professional opinions and recommendations, consulting, advisory and expert services. In cooperation with universities, the NPI carries out doctoral study programmes and provides training for young scientists. Within the scope of its activity, the NPI promotes international cooperation, including the organisation of joint

research projects with foreign partners, participation in exchange programmes for scientists and the exchange of scientific information, as well as the preparation of joint publications. The NPI organises scientific meetings, conferences and seminars at the national and international levels and provides the infrastructure for research, including accommodation for its employees and guests, and for the international cooperation of the Czech Republic in the field of nuclear sciences. It pursues its aims both independently and in cooperation with universities and other research and professional institutions.

(3) The other activity of the NPI includes the development, manufacture and distribution of radiopharmaceuticals and radio chemicals under the conditions specified in the respective decisions and certificates of the State Institute for Drug Control concerning good manufacturing practice, approval for production of medicinal products including products for clinical trials, approval for running clinical trials and the registration of a medicinal product, further, pursuant to the approval of the State Office for Nuclear Safety concerning the handling of ionizing radiation sources and in compliance with the Act on Public Research Institutions. In addition, the other activity of the NPI comprises the development, manufacture and distribution of sealed radioactive sources in the form of active implantable medical devices under the conditions specified in the respective norms of the International Standards Organisation (ISO), by the decisions of the Electrotechnical Testing Institute, Government Regulation No. 191/2001 Coll., as subsequently amended, approval of the State Office for Nuclear Safety concerning the handling of ionizing radiation sources and the Act on Public Research Institutions. The total extent of the other activity may not exceed 10 percent of the working capacity of the NPI.

IV.

(1) The director, the Board and the Supervisory Board are the bodies of the NPI. The director is the statutory body of the NPI and is entitled to act on behalf of the NPI.

(2) Basic organisational units of the NPI are scientific departments responsible for research and development, and service departments responsible for provision of the infrastructure.

(3) The detailed organisational structure of the NPI is regulated by rules of organisation issued by the director after being approved by the Board.

V.

The foundation deed will become effective on 1 January 2007 and will supersede the foundation deed of the Nuclear Physics Institute of the ASCR dated 1 September 1993, as subsequently amended by the Addendum dated 15 December 1994, modifications dated 29 March 1995 and 25 August 1998 and Addendum No. 2 dated 19 December 2002 (the full text having been issued on 20 December 2002).

Prague, 20 December 2006
Ref. No.: K-539/P/06

Prof. Václav Pačes
President of the ASCR
