

SHALIMAR

(UEB 3374/2) was produced by crossing Topaz with Golden Delicious
Community Plant Variety Rights EU 25472 from 22. 06. 2009

- Origin:** Institute of Experimental Botany Prague (Strizovice), CZ
- Tree:** Diploid, medium vigour, ramified, spreading growth habit,
- Blossom:** Mid-season, flowers heavily and regularly
- Picking time:** Middle to end October, about two weeks after Golden Delicious, eating maturity since January
- Productivity:** Precocious, annual producer of heavy crops
- Keeping quality:** In natural storage until April
- Fruit:** Medium size, shape conical, stem medium long, skin smooth, free of russet, yellow green to yellow ground color is covered with about 80 % solid red flesh and weakly defined stripes, flesh is yellowish, firm, crisp, juicy, with high and harmonic sugar and acid content and very good flavour
- Diseases:** Resistant to scab (*Vf*), tolerant to mildew
- Comment:** A late-winter, highly productive, scab resistant apple variety with brightly red conical fruits, having good keeping quality and good shelf live after storage, suitable especially for warm, sunny apple producing areas, where the fruits achieve very good taste and high sugar and acid content
