

The Student Scientific Conference on Biotechnology and Biomedicine, Brno 10th - 12th April 2013

Dear friends, it is our pleasure to invite you in name of Masaryk University and students organization Biomania to another year of **The Student Scientific Conference on Biotechnology and Biomedicine**, which will take place **10th - 12th April 2013** in the cosy environment of the **main hall of the Office of the Public Defender of Rights in Brno, Czech Republic**. In 2013, the conference is dedicated to the topic of **BIOMEDICINE**.

The meeting offers the unique opportunity for **students of bachelor, master and doctoral programmes** to present their work in the atmosphere of professional conference, yet in front of the friendly audience consisted mostly of students. The conference provides the possibility to meet young colleagues not only from other Czech universities but also from other countries of the Central European region – **Austria, Poland, Slovakia, Germany and Hungary**.

The conference will be divided in four sessions in 2013:

Molecular Biology of Non-Oncological Diseases

Molecular Oncology

Nucleic Acids Research in Biomedicine

Tissue Engineering and Stem Cell Research.

Dr. Manuel Serrano, who discovered and characterized tumor suppressor p16, will give his talk on Wednesday 10th April as a keynote lecturer. The keynote lecture will be open for public.

The best student talk and poster in each session will be awarded by valuable prize.

For more detailed information please visit **www.biomania.cz/conference-2013**. Registration is opened from **1st January 2013**. Do not hesitate with registration, conference hall is **limited to 150 participants**.

We are looking forward to seeing you in Brno.

For organizing committee Pavel Dvořák
