CONVERIS:
# Managing the complete research life cycle

THOMSON REUTERS

CONVERIS

A solution dedicated to:

- Universities
- Research organizations
- Funding agencies

Facts & Figures:

- Founded in 2004
- Part of Thomson Reuters since Dec 2013
- Main office in Karlsruhe, Germany
- Rapidly increasing global CONVERIS Community

THOMSON REUTERS

INTRODUCTION

Support along the Research Lifecycle

✓ Match funding opportunities

✓ Documents
✓ Validation for new accounts

✓ Reporting back to funder: Input vs. Output

✓ Public presence: Web & CVs
✓ Reporting internal & external

IDEAS → **PROPOSALS** → **PROJECTS** → **RESULTS** → **EXPLOITATION**
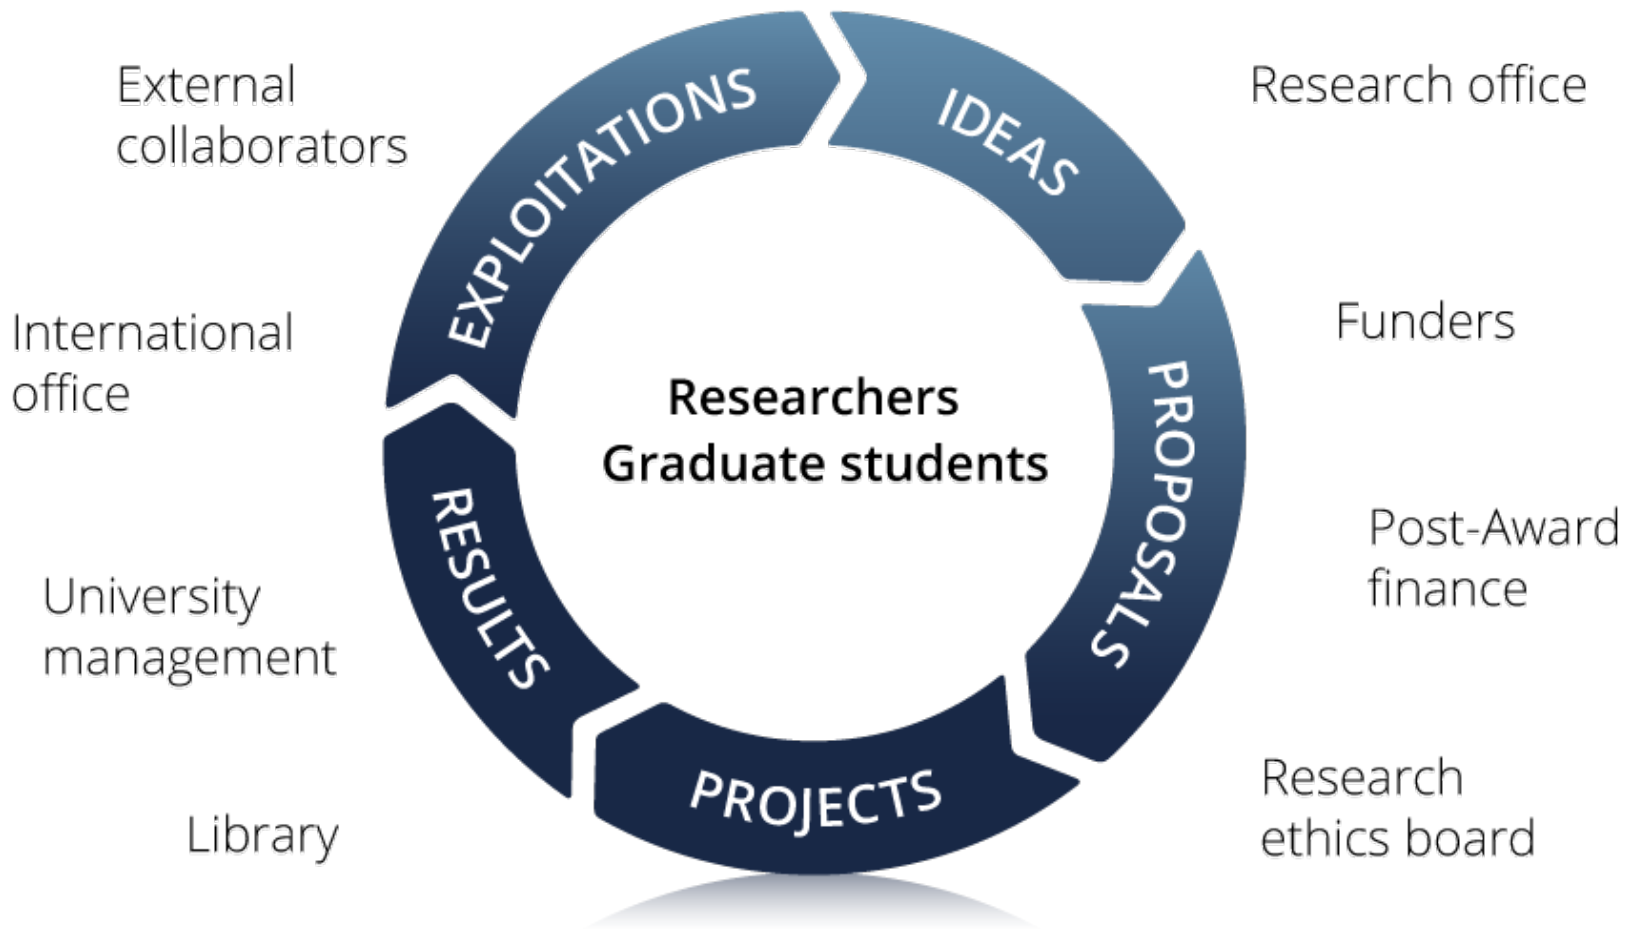

✓ Budgeting
✓ Internal approvals
✓ Ethics reviews

✓ Controlling: Budget vs. Expenditure & Forecast
✓ Tasks & deadlines

✓ Validation processes: OA repository & bibliometrics
✓ IP & licensing: Patents, expertise, products
✓ Research data

THOMSON REUTERS

Why CONVERIS?

Managing the complete Research Life Cycle

- **Better management information:** CVs, collaboration analyses, publications & bibliometrics, research projects & applications, data exports, … for **internal** decision-making **and external** demands.

- **Increased visibility:** Provide **access over the web** to information on the organisation's researchers, units and their research activities and results.

- **Efficiency:** A more efficient, streamlined **administrative process** for managing research information for researchers & administrators.

- **Scalability:** A configuration module enabling the organisation without involvement from AVEDAS to ensure that the system can match its **evolving needs over time.**

THOMSON REUTERS

Clear Benefits

- Collect data once, use it many times

- Cover all internal research service processes and workflows

- Reuse existing information though integration

- Extensive reporting possibilities

- Off-the-shelf system with strong configuration capabilities and even by the institution itself
