

# Synthetic modified RNA – Probes to Study Riboswitch and Ribosome Function

Ronald Micura

*Institute of Organic Chemistry, University of Innsbruck,  
Center for Chemistry and Biomedicine, Innrain 80-82, 6020 Innsbruck, Austria  
E-mail: ronald.micura@uibk.ac.at*

Our research aims at a comprehensive molecular understanding of important biological processes of nucleic acids, such as gene regulation by riboswitches and ribosomal translation. Chemical synthesis of modified RNA provides us with the necessary tools to achieve mechanistic insights into riboswitch function and ribosome catalysis.
