Senior leader in Health Economics & Outcome
Research (HEOR). Providing solutions to global
commercialization of pharmaceutical products
for the last 22 years.

Practical Workshop in Applied Economics: Decision Making Under Uncertainty

**22 October 2015
at 13:00**

**CERGE-EI
Politických vězňů 7
Prague 1
Czech Republic**

In a perfect world we would understand every situation and act with certainty. But what happens when the world is less than perfect and the information we have is complex? Join us to approach the issue of making decisions under uncertainty and learn how to organize the information through decision trees and examine the results. This workshop will be hands-on and interactive and the model can be applied to other disciplines such as business or finance.
