

The Czech Centre for Phenogenomics (CCP)

invites applications for

LABORATORY TECHNICIANS - PHENOTYPING SCREENS

The Czech Centre for Phenogenomics is seeking talented and motivated technical assistants to work as part of our phenotyping module for various screens (vision, hearing, metabolomics etc). You will become part of an international team dedicated to the highest standards of pre-clinical and basic biological research.

You should possess a BSc in biological sciences (or related field) and have a good command of English (spoken and written), should be well organized and capable of working as part of a team. Because the work includes daily interactions with laboratory animals, previous rodent handling experience or valid rodent handling certificate would be advantageous, but is not essential.

Successful candidates will work primarily in one unit, however, there will be opportunities for cross training with other units within the Phenotyping Module.

The Czech Centre for Phenogenomics offers state of the art research equipment and a very stimulating, international and multidisciplinary environment encompassing all aspects of mouse molecular genetics (from mutant generation to complex phenotyping). We offer opportunities for career advancement and competitive salary.

The position is available immediately as an initial fixed-term (1 year) contract, with longer term extension possible upon demonstrated proficiency. The place of work is Vestec u Prahy (CCP - BIOCEV).

The job application in English consisting of a covering letter and structured CV should be send to Mr. Libor Danek (libor.danek@img.cas.cz). If you have any questions related to the positions, please send them to this email as well.

We thank all who apply for their interest; however, only those candidates who are considered for an interview will be contacted.
