

Michal Koucký
Short Bio

After getting MSc. at Charles University, he got his PhD at Rutgers University in USA. Since 2004 he is a member of the Institute of Mathematics AS CR, and since 2013 he works at the Computer Science Institute of Charles University. For extended periods of time he visited universities and institutes in Austin, Montreal, Amsterdam, Toronto and Aarhus. He works in theoretical computer science with interests mainly in computational complexity, data structures and combinatorics. He is the principal investigator of the ERC Consolidator grant "Lower bounds for combinatorial algorithms and dynamic problems."
