

SEZNAM CITOVANÉ A DOPORUČENÉ LITERATURY:

Obecně

- BRUSCA, R. C., BRUSCA, G. J. Invertebrates. Second Edition. Sunderland, Massachusetts: Sinauer Associates, Inc. Publishers, 2003. Xix + 936 s..
- GAISLER, J., ZIMA, J.. Zoologie obratlovců. Praha: Academia 2007, 692 s.
- MACHÁČEK, T. a kol.. Proměny vyšší systematiky eukaryot a její odraz ve středoškolské biologii. Živa. 2016, vol. 64, s. 27–30.
- VOLF P., HORÁK P. a kolektiv 2007. Paraziti a jejich biologie. Triton. 318 s.
- ZRZAVÝ, J. Fylogeneze živočišné říše. Scientia, 2006. 255 s.
- ZRZAVÝ, J. Fylogeneze živočichů: ohlédnutí roku 2015. Živa. 2015: vol. 63, s. 201–203.

Cycliophora

- FUNCH, P., KRISTENSEN, R. M. Cycliophora is a new phylum with affinities to Entoprocta and Ectoprocta. Nature. 1995, vol. 378, s. 711–714.
- KRISTENSEN, R. M. An introduction to Loricifera, Cycliophora and Micrognathozoa. Integrative and Comparative Biology. 2002, vol. 42, s. 641–651.
- LAUMER, C. E., BEKKOUCHE, N., KERBL, A. et al. Spiralian phylogeny informs the evolution of microscopic lineages. Current Biology Report. 2015, vol. 25, s. 2000–2006.

Micrognathozoa, Gnathostomulida

- KRISTENSEN, R. M. An introduction to Loricifera, Cycliophora and Micrognathozoa. Integrative and Comparative Biology. 2002, vol. 42, s. 641–651.
- KRISTENSEN, R. M., FUNCH, P. Micrognathozoa: A new class with complicated jaws like those of Rotifera and Gnathostomulida. Journal of Morphology. 2000, vol. 246, s. 1–49.
- LAUMER, C. E., BEKKOUCHE, N., KERBL, A. et al. Spiralian phylogeny informs the evolution of microscopic lineages. Current Biology. 2015, vol. 25, s. 2000–2006.
- VOSOLSOBĚ, S. Pozice skupiny Micrognathozoa na stromu života. Praha: PŘF UK, 2008. 7 s.
- ZRZAVÝ, J. Micrognathozoa – zase jeden nový kmen. Vesmír. 2001, vol. 80, s. 437.

Acanthocephala

- SIELAFF, M., SCHMIDT, H., STRUCK, T. H. et al. Phylogeny of Syndermata (syn. Rotifera): Mitochondrial gene order verifies epizoic Seisonidea as sister to endoparasitic Acanthocephala within monophyletic Hemirotifera. Molecular Phylogenetics and Evolution. 2016, vol. 96, s. 79–92.
- ZRZAVÝ, J. The interrelationships of metazoan parasites: a review of phylum- and higher-level hypotheses from recent morphological and molecular phylogenetic analyses. Folia Parasitologica. 2001, vol. 48, s. 81–103.

Pentastomida

- ABELE, L. G., KIM, W., FELGENHAUER, B. E. Molecular evidence for inclusion of the phylum Pentastomida in the Crustacea. Molecular Biology and Evolution. 1989, vol. 6, s. 685–691.
- MOLLER, O. S., OLESEN, J., AVENANT-OLDEWAGE, A. a kol. 2008. First maxillae suction discs in Branchiura (Crustacea): Development and evolution in light of the first molecular phylogeny of Branchiura, Pentastomida and other “Maxillopoda”. Arthropod Structure & Development 37: 333–346.

Siphonaptera/Mecoptera

BEUTEL, R. G. A kol. 2011. Morphological and molecular evidence converge upon a robust phylogeny of the megadiverse Holometabola. *Cladistics* 27: 341–355.

MISOF, B. a kol. Phylogenomics resolves the timing and pattern of insect evolution. *Science*. 2014, vol. 346, s. 763–767.

PETERS, R. S., MEUSEMANN, K., PETERSEN, M. a kol. The evolutionary history of holometabolous insects inferred from transcriptome-based phylogeny and comprehensive morphological data. *BMC Evolutionary Biology*. 2014, vol. 14, iss. 52, s. 1–16.

TRAUTWEIN, M. D., WIEGMANN, B. M., BEUTEL, R. a kol. Advances in insect phylogeny at the dawn of the postgenomic era. *Annual Review of Entomology*. 2012, vol. 57, s. 449–468.

Anoplura/Phthiraptera

ISHIWATA, K., SASAKI, G., OGAWA, J. a kol. Phylogenetic relationships among insect orders based on three nuclear protein-coding gene sequences. *Molecular Phylogenetics and Evolution*. 2011, vol. 58, s. 169–180.

LI, H., SHAO, R., SONG, N. a kol. Higher-level phylogeny of paraneopteran insects inferred from mitochondrial genome sequences. *Scientific Reports*. 2015, vol. 5, s. 8527.

YOSHIZAWA, K., JOHNSON, K. P. Phylogenetic position of Phthiraptera (Insecta: Paraneoptera) and elevated rate of evolution in mitochondrial 12S and 16S rDNA. *Molecular Phylogenetics and Evolution*. 2003, vol. 29, s. 102–114.

YOSHIZAWA, K., JOHNSON, K. P. How stable is the “polyphyly of lice” hypothesis (Insecta: Psocodea)? A comparison of phylogenetic signal in multiple genes. *Molecular Phylogenetics and Evolution*. 2010, vol. 55, s. 939–951.

Strepsiptera

NIEHUIS, O. a kol. Genomic and morphological evidence converge to resolve the enigma of Strepsiptera. *Current Biology*. 2012, vol. 22, s. 1–5.

POHL, H., BEUTEL, R. G. The Strepsiptera-odyssey: the history of the systematic placement of an enigmatic parasitic insect order. *Entomologia*. 2013, vol 1: e4, s. 17–26.

WHITING, M. F., WHEELER, W. C. Insect homeotic transformation. *Nature*. 1994, vol. 368, s. 696.
