

Memorandum of Understanding between

Assoc. -Prof. Dr. Thomas Loerting
Institute of Physical Chemistry, University of Innsbruck
Innrain 52, 6020 Innsbruck, Austria

and

Ing. Vilém Neděla, Ph.D.
Institute of Scientific Instruments
a research institute of The Czech Academy of Sciences, having its registered office
at Kralovopolska 147, 612 64 Brno, Czech Republic

This MOU is between the research group of prof. T. Loerting and the research group of dr. V. Neděla and is developed for the purpose of facilitating research exchange activities as follows:

- Collaborative and joint research activities on the research mainly in the following topics:
 - Environmental scanning electron microscopy;
 - Development of the low temperature stage for ESEM;
- Exchange of scientific materials, publications and information;
Scope of Cooperation:
 - Global Research Collaboration;
 - Facility Use Support and Technical Support;
 - Training of the young scientists.

This MOU serves as a framework for collaborative activities carried out by researchers from both institutes. Collaborative research may be carried out separately at both institutions or at one institution.

Any expenses incurred under this MOU will be the subject of individual agreements on a case-by-case basis. Each institution will endeavor to develop the future exchange of achieved scientific results and future topics which are included in planned scientific projects.

This MOU may be amended at any time by mutual consent, and shall continue in force and effect for 3 years. It can be abrogated by written notification from either party with a three-month notification. Under such circumstances, staff or students who have commenced an activity under the Agreement shall be allowed to complete the activity, under the conditions applying when notice was given. By signing this MOU both parties agree to keep the know-how and methods used confidential. This cooperation is supported by the project AV21 (Diagnostic methods and techniques, CAS).
