Question:

Could you tell me please, how often are you planning to execute the MOCVD process and what is the duration of the typical process? It would be enough for me, if you could tell me, how many times a week and how many hours does the typical process take. I know that it would be only an estimation, but I need these data for dimensioning of your column.

Answer:

A typical process will take approx. 6-7 hours. We suppose to use the apparatus 2-3 times a week, depending on requirements.
