

## **Příkaz ředitele č. 1/2020**

### **o provozu v kultivačních místnostech pro nesterilní kultivaci v budově B1**

S platností od 24. ledna 2020 nařizují uživatelům kultivačních místností pro nesterilní kultivaci č. 012, 015 a S2 řídit se předpisy, které jsou v příloze tohoto příkazu. Příkaz se vztahuje na všechny uživatele kultivačních místností č. v budově B1 Rozvojová 263.

V Praze, dne 23. ledna 2020

RNDr. Martin Vágner, CSc.  
ředitel ÚEB AV ČR

## **Order of director No. 1/2020**

### **setting the rules of cultivation rooms for non-sterile cultivation in B1 building**

Everybody is obliged to strictly follow the rules regulating the working of cultivation rooms No. 012, 015 and S2 in B1 building, Rozvojová 263 (in appendix of the order).

Prague, January 23, 2020

Martin Vágner  
director of IEB

# Rules for Growth Room Users

Each user has to register to an e-mail group [UEB1-cultivation@googlegroups.com](mailto:UEB1-cultivation@googlegroups.com) to receive info and warnings (contact [synek@ueb.cas.cz](mailto:synek@ueb.cas.cz) to add yourself).

## COMMON PRACTICE

- **Label** all trays/pots on the FRONT with your NAME and line number or email.
- **Remove** IMMEDIATELY all waste (to your lab or greenhouse in autoclavable bags)
- **Refill** bottles after watering.
- After harvesting **clean up** SHELVES and switch lights OFF if empty.

## KEEPING INSECT UNDER CONTROL

- **Rotation** of a “CLEAN” and “MATURATION” room: Upon announcement, new plants will be placed only the clean room, while the another will serve for maturation and will be then closed for thorough cleaning.  
**NO transfer** of any plants from a MATURATION room to a CLEAN room.
- **Water sparingly**, because too much water favors gnats (*smutnice*).
- **Always FREEZE** your harvested dry **seeds** at -20 °C for 2 days to kill thrips (*třásněnky*). Plants infested with thrips will be TRASHED!
- If you detect some insect, **apply insecticides**.
- **Do not enter** growth rooms in your OUTDOOR shoes. Smart people also do not walk from the MATURATION room to the CLEAN room, but the other way round.

## AVOIDING GENETIC CONTAMINATION

- **Wrap** flowering plants or **tie them to sticks**.
- Transfer **maturing plants to bottom** shelves.
- **Harvest seeds** ASAP, and then **remove** all your tools and waste.

**PLANTS THAT ARE SOURCE OF PESTS, NOT LABELED CLEARLY or DEAD will be TRASHED by the supervisor.** By using growth rooms you agree with the conditions above. Users who don't follow the rules repeatedly will be reported to the director.

The supervision and growth room cleaning will run on a rotary basis between labs until a professional staff is established.
