

BECOME A DATA-DRIVEN CHANGEMAKER

The MA in Applied Economics (MAE) program develops curious, impact-driven individuals who will help build better societies. The program combines the best of data analytics and cutting edge approaches in economics.

EARN A TOP-NOTCH EDUCATION IN ECONOMICS

Benefit from a well-developed curriculum taught by lecturers from the **CERGE-EI international faculty**, business professionals, and experts (e.g. **ČNB, ČSOB, Moody's**). Become part of the **best economics research center in the Czech Republic**.

OBTAIN HANDS-ON DATA EXPERIENCE WITH A REAL LIFE IMPACT

Using advanced data analysis skills, our MAE students have helped the non-profit organization **Houpací sociální síť**, identified and addressed the needs of **children in foster care**, developed a track-to-help system for **homeless people** in Prague, and devised new tools for raising the **political awareness of Czech youth**.

ENHANCE YOUR PERSONAL AND PROFESSIONAL DEVELOPMENT

The MAE's **individual coaching and mentoring programs** put students in touch with influential mentors, including top executives from companies such as **Google** and **BCG**, entrepreneurs from **startup companies**, and leaders in the **public sector**.

GIVE BACK TO THE COMMUNITY

Participate in various social work activities (eg. mentoring high school students from the **Duke of Edinburgh Award** program.)

INTERACT WITH YOUR FUTURE EMPLOYERS

Work on unique projects for clients from **both the business and non-profit sectors**. Our students have worked with **Seznam.cz** to evaluate viewing patterns on the Stream.cz video platform, and with **Česká spořitelna** bank to identify the fundraising potential of the Czech market.
