

Intermediates and Products of Electrode Reactions

18.-22.5.1970

Smolenice

Program:

1. Intermediates of electrode reactions

B.E.Conway (Ottawa), chairman H.Gerischer (Munich)

2. Electrochemical methods for the study of intermediates and products of electrode reactions

M.Fleischmann(Southampton), chairman I.Shain (Madison)

3. Significance of preparative methods for studying the mechanism of electrode reactions

J.Volke (Prague), chairman H.Lund (Aarhus)

4. Application of optical methods in the detection of intermediates

T.Kuwana (Cleveland), chairman J.Koryta (Prague)

5. Electroluminescence

D.M.Hercules (Cambridge, Mass.), chairman Z.Grabowski (Warsaw)
