

PROGRAM

MONDAY, SEPTEMBER 7

Introduction to Experimental Cardiovascular Research

Organized by: Institute of Physiology CAS

Laboratory of Developmental Cardiology, Laboratory of Experimental Hypertension

Venue: Institute of Physiology CAS, Vídeňská 1083, Prague 4

9:00 – 12:00 Lectures

- molecular background of pacemaker potential, spreading of action potential in the heart, conduction system, regulation of heart rate, mechanism of arrhythmias (D. Sedmera)
- myocardial hypoxia and ischemia/reperfusion, cardioprotection (J. Neckář)
- myocardial hypertrophy and heart failure (J. Neckář)
- mechanisms of blood pressure regulation, calcium influx, calcium sensitization (I. Vaněčková)
- pathophysiology of hypertension, end-organ damage in hypertension and chronic kidney disease (I. Vaněčková)

12:00 – 13:00 Lunch

13:00 – 16:00 Demonstrations

- non-invasive assessment of structural and functional properties of the heart with ultrasound (echocardiography)
- isolated perfused heart and its use in experimental cardiology and pharmacology
- preparation of isolated ventricular myocytes for physiological experiments
- use of telemetry for continuous monitoring of hemodynamic parameters (blood pressure, activity ...)
- acute blood pressure monitoring in conscious animals
- functional assessment of embryonic cardiovascular system by videomicroscopy
- assessment of contractile properties of vascular smooth muscle

PROGRAM

TUESDAY, SEPTEMBER 8

Introduction to Experimental Research on Metabolism

Organized by: Institute of Physiology CAS

Laboratory of Adipose Tissue Biology, Laboratory of Epithelial Physiology,
Laboratory of Bioenergetics, Laboratory of Biological Rhythms

Venue: Institute of Physiology CAS, Vídeňská 1083, Prague 4

9:00 – 12:00 Lectures

- cellular energy provision, intermediary metabolism, mitochondria, and mitochondrial oxidative phosphorylation (T. Mráček)
- mitochondrial myopathies – rare inherited diseases of mitochondrial metabolism (P. Pecina)
- energy balance, adipose tissue, obesity and associated metabolic diseases (M. Rossmeisl)
- nutrition, types of dietary lipids, dietary interventions using n-3 fatty acids (O. Kuda)
- Laser Captured Microdissection (LCMD) - general info, options, limits, and processing of LCMD samples (M. Vodička).
- basic mechanisms of circadian regulation (A. Sumová)

12:00 – 13:00 Lunch

13:00 – 16:00 Demonstrations

- metabolic screening using mass spectrometry
- methods for phenotyping metabolism at the whole body level
- preparing tissue for LCMD (staining, cutting, fixation), dissecting regions of interest
- recording of circadian rhythms - from human to Petri dish

PROGRAM

WEDNESDAY, SEPTEMBER 9

Introduction to Drug Development Process

Organized by: Institute of Organic Chemistry and Biochemistry CAS

**Venue: Institute of Organic Chemistry and Biochemistry CAS,
Flemingovo nám. 2, Prague 4**

9:00 – 12:30 Lectures

- introduction (Z. Hostomský and M. Fusek)
- structure biology (P. Maloy Řezáčová)
- in silico chemistry (P. Hobza)
- medicinal chemistry I (Z. Janeba)

12:30 – 13:30 Lunch

13:30 – 16:00 Lectures and demonstrations

- HBV initiative (I. Píchová)
- medicinal chemistry II (R. Nencka)
- tour around the institute

Bruker Avance III HD, 600 MHz Cryo

PROGRAM

THURSDAY, SEPTEMBER 10

Introduction to Chemical Biology and Advanced Imaging for Biomedical Research

Organized by: Institute of Molecular Genetics CAS

Venue: Institute of Molecular Genetics CAS, Vídeňská 1083, Prague 4

9:00 – 12:00 Lectures

Chemical biology in Academia what is probe and what is drug?

- drug repurposing, biochemical
- cell-based and model-organism-based assays
- signaling pathways, target ID
- big data and how to make sense out of it

Advanced bioimaging - principles of fluorescence microscopy

- fluorochromes, confocal microscopy
- principles of super-resolution microscopy (STED, SIM, STORM/PALM)
- live cell imaging
- principles of electron microscopy TEM, STEM and SEM for biomedicine,
- cryoelectron microscopy and tomography
- immunodetection of molecules
- principle of analytical ultrastructural methods

12:00 – 13:00 Lunch

13:00 – 16:00 Demonstrations

National Infrastructure for Chemical Biology (CZ-OPENSREEN)

- high-throughput screening - demo of laboratory automation
- high-content screening (image-based, label-free)
- compound storage and logistics – demo of advanced microplate reformatting

National Infrastructure (Czech Bioimaging)

- comparison of various imaging methods, sample preparation for photon microscopy
- demonstration of ultrastructural tomography
- tour around the institute

PROGRAM

FRIDAY, SEPTEMBER 11

Introduction to Neuroscience

Organized by: Institute of Physiology CAS

Laboratory of Pain Research, Laboratory of Neurophysiology of Memory, Laboratory of Developmental Epileptology, Laboratory of Neurochemistry, Laboratory of Cellular Neurophysiology

Venue: Institute of Physiology CAS, Vídeňská 1083, Prague 4

9:00 – 12:00 Lectures

- molecular pharmacology of muscarinic receptors (J. Jakubík)
- glutamate receptors in health and disease (L. Vyklický)
- experimental neurobiology of learning and memory (J. Svoboda)
- pain pathophysiology and mechanisms (J. Paleček)
- pathophysiology of epilepsy and epilepsy-related comorbidities, epileptogenic insults and acquired epilepsies (H. Kubová)

12:00 – 13:00 Lunch

13:00 – 16:00 Demonstrations

- methods in molecular pharmacology of muscarinic receptors
- patch clamp technique to record ion channel activity
- learning and memory in rodents: Behavioral tests and optogenetic approach
- measurement of pain in rodents, spinal cord slice electrophysiology
- registration of spontaneous and evoked electrical activity of the brain
