The Search of Papers using *EconLit*

Once it is known which paper is sought for (title, authors, year, journal name are known, i.e. “Risk-Taking and Risk-Sharing Incentives under Moral Hazard” by Belhaj, Bourles, and Deroian in *AEJ: Microeconomics* in 2014), then, the *EconLit* depository could be used for getting access to its full-text version. Library

The CERGE-EI Library, established in 1992, has grown into a rich resource of economic literature, housing journals and contemporary economic literature. Today it is considered the best library of its kind in Central and Eastern Europe and, as such, is an important center for library services in Economics.

The library has been enhanced thanks to grants from the Austrian government, the Westinghouse Foundation and through support from the University of Pittsburgh. The library has benefited from the support of the U.S. Agency for International Development in 2006-2010, and 2012-2014. The serial collection has been enhanced over the years through grants from Komerční banka, a.s., and Česká národní banka.

The Search of Papers using *EconLit*

2.2 The result of the search is seen below

The screenshot displays the EconLit search interface. At the top, there is a navigation bar with options like 'New Search', 'Full Text Publications', 'Cited References', 'Images', and 'More'. The search bar contains the query 'Risk-Taking and Risk-Sharing Incentives un' with a dropdown menu set to 'TI Title'. Below the search bar, there are filters for authors (Belhaj, Bourles, Deroian) and source (American Economic Journal: Micro). The search results section shows 'Search Results: 1 - 1 of 1' and a single result titled 'Risk-Taking and Risk-Sharing Incentives under Moral Hazard' by Belhaj, Mohamed; Bourles, Renaud; Deroian, Frederic. The result is published in the 'American Economic Journal: Microeconomics' in February 2014, volume 6, issue 1, pages 58-90. The publication year '2014' is highlighted with a red box and labeled 'Publication period'. The result also includes subject terms, a list of images, and options for full text and cited references.

A note:

Using *EconLit* directly is more reasonable when a paper sought for is published in a core professional journal. Otherwise, especially when a paper is published in some working papers series or in a non-economic journal, it is more reasonable to use the other two alternatives depending on available information.
