

Institute of Experimental Medicine, AS CR

Is pleased to invite you to the workshop entitled:

Genomics, epigenomics and microenvironment in colorectal cancer

Which takes place 9th of December from 9 am in Turquoise lecture hall of the IEM AS CR, Videnska 1083, Prague, Czech Republic.

Alessio Naccarati: Identification and comparison of plasma/stool miRNA signatures in colorectal cancer by next-generation sequencing

Barbara Pardini: Microbiom and colorectal cancer

Andrea Gsur: Colorectal cancer study of Austria (CORSA): Genomics and Metabolomics based findings

Asta Foersti: Identification of colorectal cancer predisposition mutations and their functional consequences

Vaclav Liska: Experimental surgery

Klara Kostovcikova: Immunomodulatory properties of dietary components, commensal microbiota and antibiotics

Ondrej Kubecek: Molecular biomarkers in CRC: A clinician point of view

Veronika Vymetalkova: Genetic variations as predictor of clinical outcome in colorectal cancer patients treated with 5-fluorouracil.

Pavel Vodicka: Some sources of genomic instability in colorectal cancer

Tomas Buchler: Regorafenib and TAS-102 for mCRC, last line, last hope?

Eva Budinska: A repertoire of gut microbiota in colon cancer patients and its correlation with clinical and molecular variables.
