

Czech Centre for Phenogenomics

4th CCP Phenogenomics Conference 2022

Vestec & on-line • 15 – 16 September

Main topics

- Rare diseases
- Experimental models
- Delivery of therapies
- Gene therapies

Keynote speaker

- **Ophir Klein**
University of California,
San Francisco, USA

Invited speakers

- Reetta Hinttala
- Stanislav Kmoch
- Damian Smedley
- Tomas Stopka
- Seppo Ylä-Herttuala

Czech Centre for Phenogenomics (CCP)

CCP is a large research infrastructure unique in combining genetic engineering capabilities, advanced phenotyping and imaging modalities, SPF animal housing and husbandry, as well as cryopreservation and archiving, all in one central location – at BIOCEV campus.

Through its membership in INFRAFROntier and IMPC, CCP is a partner in a global network that aims to comprehensively and systematically analyze the effect of loss of function gene mutations in mice. The goal is to produce a comprehensive 'encyclopedia' of gene function, that will help identify causative factors of human diseases as well as novel targets for therapeutic intervention.
