

Guest Editors Introductory Words

Dear readers,

due to the COVID-19 pandemic and consequent restrictions and lock-downs, a traditional annual congress of the Czech and Slovak Physiological Societies – the 97th Physiological Days has been postponed to February 2022. However, the board of the Czech Physiological Society decided to support members of both societies by organizing this Supplementum of the Physiological Research for Czech and Slovak authors within the field of physiology. We are glad to introduce twelve original and four review articles covering various physiological topics based on research of Czech and

Slovak scientific groups. The next annual meeting of the Czech and Slovak Physiological Societies – the 97th Physiological Days will take place in Prague at the Institute of Physiology of the 1st Faculty of Medicine of the Charles University in February 2022. We wish to organizers and participants successful and fruitful meeting at one of the famous institutes of physiology.
